PROJECTS

GPT-Clone Agent – LangGraph, FastAPI, RAG, Multi-LLM | [GitHub](#) Jul 2026 – Aug 2026

- Architected a containerized AI assistant using **LangGraph** and **LangChain** with tool orchestration, long-term memory, and document RAG.
- Implemented autonomous tool usage and **dynamic multi-LLM routing** for web search, calculation, memory, and document retrieval.
- Built **persistent, resumable conversation memory** using SQLite checkpoints and thread-level state management.

Tech Stack: LangGraph, LangChain, FastAPI, SQLite, RAG, Multi-LLM Routing

Daily Quotes – Kotlin, Jetpack Compose, Retrofit Jun 2026 – Aug 2026

- Built an Android application in **Kotlin** and **Jetpack Compose** that surfaces random inspirational quotes on demand, refreshed with a single tap.
- Integrated the **ZenQuotes REST API** using Retrofit to fetch and display live quote text and author information in real time.
- Implemented **loading and error-handling states** alongside a native Android share action, letting users reliably fetch and share quotes.

Tech Stack: Kotlin, Jetpack Compose, Retrofit, REST API

TRAINING

Mobile Application Development – Training Program | [Certificate](#) Jun 2026 – Jul 2026

- Completed hands-on training in mobile application development, covering app design, cross-platform frameworks, and deployment workflows.

Web Development – Summer Training | [Certificate](#) Jun 2024 – Jul 2024

- Completed summer training in web development, covering front-end and back-end fundamentals and building functional web applications.
